Authority

This plan is prepared at the direction of the Executive Committee of the South Australian Clay Target Association Inc to allow for a coordinated response to any incident which might occur within any of the involved areas or venues during the period, 1 January 2023 – 31 December 2023.

Each SACTA Club Secretary has the responsibility for the implementation of this plan and for liaison between SACTA Executive, the Australian Clay Target Association, the SA Government and SA Police in the event of any incident or emergency.

In the event of a declared major incident, declared major emergency or declared state of disaster, the Emergency Services Functional Services get their authority from the Emergency Management Act through authorised officers under a declaration made by the Commissioner of Police as State Coordinator.

This plan allows for the lawful transfer of authority for any part of an involved area during any incident in support of measures which may need to be taken by members of SA Police, SA Ambulance Service, SA Metropolitan Fire Service or any Functional Service as described in the SA State Disaster Plan.

This emergency response plan is in existence for the period 0001 hours on 1 January 2023 until 2359 hours on 31 December 2023 during the conduct of any clay target event (including practice or any other session) and can be implemented in full or in part at any time in response to the management of an emergency.

Definitions

In this document, unless the context otherwise requires:

“ACTA” means the Australian Clay Target Association Inc.

“Executive” means the State Executive of the South Australian Clay Target Association.

“Clay Target Club” means a club associated with the conduct of the sport of clay target shooting.

“Clay Target facility” means a venue or facility utilised for the conduct of the sport of clay target shooting

“ComCen” means the Communications Centre (usually of an Emergency Service Organisation)

“DHS” means the Department of Human Services (previously the SA Health Commission)

“EOC” means the Emergency Operations Centre

“ESO” means the Emergency Service Organisation. In this event includes SA Metropolitan Fire Service, SA Ambulance Service, State Emergency Service and usually extends to include SA Police.

“Clay Target Club” means “Clay Target Club”

“SAAS” means the SA Ambulance Service

“SAMFS” means the SA Metropolitan Fire Service

“SAPOL” means the SA Police

“SES” means the State Emergency Service

Introduction

Clay Target shooting is a sport involving firearms that is conducted in South Australia and Australia. This sport is conducted at various venues in the state of South Australia, referred to as “Clay Target Clubs” or “Clay Target Clubs”.

A variety of venues will be used throughout the sport. A series of maps depicting the involved areas appear as Appendix 6.

Aim

The aim of this plan is to provide an efficient, effective and coordinated response to any incident occurring within any of the venues, and to mitigate the impact of any incident, emergency or disaster.

This document therefore provides an outline of arrangements for the effective and efficient mobilisation of resources to manage any emergency occurring during the proclaimed time frame.

Scope

The scope of this plan is to provide a platform for the coordinated response of the Clay Target Club to any emergency impacting upon the conduct of the sport and any associated activities.

This activity will extend to include support to the activities of any of the functional services of the State of South Australia acting in accordance with their legislative roles as required under the Emergency Management Act.

Hazards

An aggregated panel of experts was used to consider the risks and hazards associated with such an event.

- The risk matrix model used is the Australian and New Zealand Standard AS/NZS ISO 31000: 2018 as used by the Justice Portfolio of the SA Government and as taught by the University of Adelaide. Copies of the Risk Definitions, Risk Register and Risk Action Plan documents are available from file as a consolidated document, as required.

Venue incidents and emergencies

All incidents occurring at any venue are the responsibility of the Club Secretary. The Club Secretary (or nominated deputy) will ensure that normal assistance is gained to resolve the issue. Generally this will include the contact of, and working with emergency services.

Emergency management

The command, control and co-ordination of any incident will be undertaken by members of the Police and Emergency Services consistent with existing legislation and current practice.

In the event of any significant emergency, additional human and physical resources of the Clay Target Club will be made available to the emergency services by the Club Secretary.

Issues which might impact on the continuation of any event will be made in consultation with the SAPOL Commander and the President of the Clay Target Club. In the event that consensus cannot be reached, the SAPOL Commander will make the final decision.

Activation of the emergency plan

In the event of an incident, emergency services will respond in the manner which is normal to their own modus operandi, based on information received regarding the incident. Once an informed on-site assessment has been made that indicates that an incident is larger than can reasonably be described as “normal”, any requests for assistance from the Clay Target Club will be made to the Club Secretary.

The Club Secretary (or nominated person) will make contact with key personnel and call them to a state of readiness as necessary. Key personnel involved are those nominated as the Club President, Shoot Marshall and Club Committee.

As an immediate follow on, it is essential that the Club Secretary alerts the Club President; the decision to activate this plan in whole or in part will then rest with him or her in conjunction with the SAPOL Commander.

Once notified, key personnel will then immediately attend their area of responsibility and conduct an audit of available assets, combining a loss and damage report, to confirm that their property and services are intact and functional.

On completion of this survey, key members will report the result to the Club President. These members will then stand by for other duties as directed by the Club President or Club Secretary as appropriate.

Similarly, key contractors and staff will also immediately attend their area of responsibility and conduct an audit of available assets combining a loss and damage report to confirm that their property and services are intact and functional.

On completion of this survey, key members will report the result to the SACTA Secretary.

Club members involvement in emergency operations

Club members are required to assist with emergency operations only at the request of the SA Police Commander.

Media management

In the event of an incident attracting media attention, media management will occur in accordance with the responding agency's standard operating procedures.

All media enquiries in relation to the conduct of SACTA should be referred to the SACTA Secretary.

To give a clear and consistent message, the SACTA Secretary will liaise closely with the Media Liaison Officers from each of the emergency services organisations.

Glossary of terms and definitions

Activated incident

An incident which requires remedial action (beyond that normally available at the scene of the incident) including:

- the mobilisation of emergency services; or
- medical intervention.

Casualty collecting area

The initial collecting point where rescue services evacuate patients from an area of danger. Paramedics and first aid staff will commence triage of patients at this site.

Command

The lawful direction of members of an organisation (enshrined in legislation or in contract of service) to undertake tasks. Each organisation engaged in clay target activities must appoint a person capable of undertaking such a role, this person normally being the designated Shoot Marshall.

Control

Control is vested in the lead combatant authority and provides or allows for the authority to direct or advise other commanders. The lead combatant authority may change depending on the incident circumstances. For example, in a fire scenario the senior fire-fighter will be the Incident Controller; if the case of a number of persons injured, the most suitable paramedic will assume the role of Incident Controller; logically of course if the scenario is primarily one of a criminal nature, a police officer will become the Incident Controller.

Coordination

Coordination is the bringing together of activities to resolve an issue or incident. It is the systematic acquisition of human and physical resources to contain and finish an incident. Coordination is the legislated role of SA Police.

Critical incident

An incident which results in

- injury (of significance) to a member of the public; or
- serious injury to any person which is likely to cause death.

Disaster

“Any occurrence, including fire, flood, tempest, earthquake, eruption epidemic of human, plant or animal disease, hostilities directed by an enemy against Australia, and accident, that:

- causes or threatens to cause, loss of life or injury to persons or animals or damage to property; and
- is of such magnitude that extraordinary measures are required in order to protect human life or property”.

Event stopping – public area emergency

An emergency in the public area which creates an unacceptable danger to personnel, competitors or officials in the restricted area. The Shoot Marshall of the event, possibly on the advice of a senior police officer or other senior official of the meeting, must make the decision to stop the event.

Forward command post

A relatively safe area in the near vicinity of any incident from where emergency service commanders will manage that incident.

Incident

An occurrence that can be adequately managed with the normal response of everyday services to satisfactorily resolve a situation in a timely manner.

It is an unusual or unplanned event (of significance) which:

- occurs as a direct result of clay target activity; or
- affects the safety of any person engaged in clay target activity; or
- exposes any deficiency in safety procedures of facility

Ultimately, it is the responsibility of the Club Secretary to determine whether an event constitutes an Incident.

Major emergency

“Any occurrence, including fire, flood, tempest, earthquake, eruption epidemic of human, animal or plant disease, hostilities directed by an enemy against Australia, and accident, that:

- causes or threatens to cause, loss of life or injury to persons or animals or damage to property; and,
- that whilst not constituting a disaster, should, in the opinion of the State Coordinator, be dealt with under the Act because of the diverse resources required to be used in the response to the emergency, the likelihood of the emergency escalating into a disaster or for any other reason.

Public area emergency

An emergency in the public area involving danger to property or members of the public, but not involving the clay target facility or restricted areas.

General information

Alcohol and drugs

The use of controlled and / or illegal substances by any competitor is strictly prohibited. All competitors are requested to refrain from alcohol consumption whilst competing in the sport.

Communications

It is requested that all Clay Target facilities and Club Secretaries have telephone contact for their events. The telephone numbers are provided in Appendix 1.

Emergency numbers

Emergency Number

POLICE – AMBULANCE – FIRE 000

Insurance

Public Liability insurance has been provided for the ACTA by Sportscover Australia Pty Ltd Lloyds Underwriters

Appendix 3

Emergency response procedures

Introduction

The following EMERGENCY RESPONSE sequences have been developed in conjunction with the emergency services.

The purpose of this procedure is to familiarise key personnel in all organisations but in particular managers and supervisors, on the principles of incident management. Supervisors and managers are responsible at law for the actions or omissions of their staff.

Fire can be the prime reason for the implementation of an EMERGENCY RESPONSE however there are other events which may occur that require the total or part evacuation of a building including bomb threats or collapse of a structure.

It is important that all of your staff is familiar with these basic procedures, as a proper understanding could save life or alternatively, limit the risk of injury, and/ or prevent loss of valuable equipment and property.

A Few Tips

- You must know where you are – always orientate yourself to your surroundings and try and locate your position on a circuit map
- Find and identify the manager/ supervisor in your area
- Start from the outside of the building and identify an assembly area (safety zone) in case an evacuation is necessary – remember you may not decide to evacuate it may be done for you
- Note the position of all fire extinguishers in your area.
- Note the building or facility layout and at least one emergency evacuation route that will lead to your identified assembly area
- In the event of an evacuation, take a roll-call
- NEVER re-enter a building until approved by Police and/or Fire

EMERGENCY RESPONSE PROCEDURES

In the event of a
LIFE THREATENING EMERGENCY

000

**Ambulance
Fire
Police**

South Australia

WHAT HAS HAPPENED:	try and summarise in less than ten words
WHERE:	describe incident site include stand names/ numbers
PHONE NUMBER	provide details then stay off the phone until help arrives

FIRE

FIRST

- Remain calm
- Assist anybody in immediate danger
- Raise the alarm -
- **Contact the Fire Service
Dial 000**
- Restrict the danger area (close doors and windows)
- Evacuate to the designated Safety Zone
- Remain clear of the danger area.
Designated Safety Zone for this area is.....

THEN

- Remain in the Safety Zone
- Await further instructions from the authorities.
- Fight the fire only if it is safe to do so and if trained to use available equipment.

CAUTION

- DO follow designated escape routes and fire exits
- DO NOT run or push in stairways.
- DO NOT re-enter building until advised by authorities

AMBULANCE EMERGENCY

FIRST

- Call for Help in the immediate area or IF TRAINED administer first aid.
- Check for danger in the immediate area.
eg. electrical faults, dangerous objects / substances.
- **Contact the Ambulance Service**
Dial 000
- Arrange to meet the Paramedics

THEN

- Remain with patient until Paramedics are on site

Other medics in my area are

Name	Phone No.	Location
.....		
.....		
.....		
.....		

CAUTION

- Help only within your limits
- Don't become a victim

CHEMICAL SPILLAGE

FIRST

- Establish what has been spilled (if practicable).
- Warn other persons in the vicinity of possible danger.
- If type of spillage or effects unknown EVACUATE
- **Contact the Fire Service
Dial 000**
- Location of spillage
- Type / Name of chemical, if known
- Size of spillage
- Danger associated with spillage (eg. fire, fumes, burns, poison)

THEN

- Evacuate affected area and close doors/ windows.
- Wait for the assistance of the Fire Service.

CAUTION

- DO follow designated escape routes and fire exits
- DO NOT run or push in stairways.
- DO NOT re-enter building until advised by authorities

BE ALERT

- Fire
- Fumes
- Burns
- Poison

FLOODING/ STORM WATER DAMAGE

FIRST

In the event of severe flooding or storm water damage within a building or confined area:-

Contact your Supervisor/ Manager and state;

- Location
- Extent of flooding
- Cause (if known)

THEN

- Commence evacuation as required
- Await the assistance of Emergency Services or Engineering Services

CAUTION

- Short circuiting of water-affected electrical supply.
- Hazards due to contamination / presence of water.
- Build up of water in a roof space may result in the sudden collapse of ceiling structure.
- Sealing flood affected rooms may result in rising water within the area.
- Allow water to run-off where possible.

EXPLOSION / EARTHQUAKE / STRUCTURAL COLLAPSE

FIRST

- **Contact the relevant Emergency Services
Dial 000**
- Assist injured or physically impaired persons.

THEN

follow instructions

- Evacuate the danger area (close doors and seal off if possible).
- Turn off utilities (power, gas, water).
- Await the assistance of Emergency Services.

CAUTION

Earthquake Safety Information:

In an earthquake, if indoors, stay there

- Take cover under a sturdy piece of furniture or counter or brace yourself against an inside wall.
- Protect your head and neck.

If outdoors, move into the open,

- Away from buildings and overhanging power lines.

After an earthquake, stay away from windows, skylights and items that could fall.

- Do not use the elevators.
- Use stairways to leave the building if it is determined that a building evacuation is necessary.

TELEPHONE / BOMB THREAT

Write straight on to this page

RESPONSE BY RECEIVER OF CALL

- Remain calm
- Don't hang up
- Record the exact wording and nature of the threat.
- Ask the following questions and record the answers.

GENERAL THREAT

What are you threatening to do?
Why are you making this threat?
When do you intend to carry it out?
Do you intend to telephone again?
What is your name?
Where are you?
What is your address?

BOMB THREAT

When is the bomb going to explode?
Where did you put the bomb?
When did you put it there?
What does the bomb look like?
What kind of bomb is it?
What will make the bomb explode?
Did you place the bomb?
Why did you place the bomb?
What is your name?
Where are you?
What is your address?

EXACT WORDING OF THREAT

.....
.....
.....
.....

CALLERS VOICE (tick as appropriate)

Male	Slow	Slurred	Deep breathing
Female	Rapid	Nasal	Cracking voice
Old	Soft	Stuttering	Disguised
Young	Loud	Lisping	Accented
	Laughing	Raspy	Familiar
	Emotional	Abusive	Inconsistent
	Well-spoken	Incoherent	Irrational
	Foul	Recorded	Message read by caller

BACKGROUND NOISES

Street noises	House noises	Clear
Crockery	Motor	Muffled
Voices	Aircraft	Static
PA System	Office machinery	Fading
Music	Factory machinery	Local
	Animal noises	Long distance

Other
details.....
.....
